Cyrille E. Mvomo

+1 (438) 470 9643 | cyrille.mvomo@mail.mcgill.ca | Montreal, Canada | *Citizen of France*

Summary

Cyrille (*He/Him* | *Black*) is a clinician-informatician currently pursuing a Ph.D. at the *Human Brain Control of Locomotion Laboratory (HBCL)* at McGill University (Canada) and the *Data Analytics and Rehabilitation Technology Laboratory (DART)* at Lake Lucerne Institute (LLUI, Switzerland). His doctoral research **employs data mining techniques to improve the clinical interpretability of digital mobility biomarkers in Parkinson's disease**. His work has received multiple prestigious distinctions ranging from institutional to international levels, including the **Next Generation Scholar Recognition from IEEE-EMBS, Google, and the US National Science Foundation**. Beyond research, Cyrille's commitment to improving STEM education through innovative teaching and mentoring approaches has also been recognized internationally. He envisions a future as an academic where, on the one hand, he will establish a research program centered on intelligent **wearable systems that generate clinically interpretable insights to inform personalized care in geriatric populations with mobility impairments** and, on the other hand, develop new educational approaches that empower learners with complex needs.

[Colored text and icons includes links to proofs, relevant materials or CV sections]

Education

Labels:
Diploma/Certificate
Official Transcripts

Montreal, Canada **McGill University**
2023-2028 Ph.D. in Biomechanics & Neurosciences (project R.06 below)
Committee: Dr. Paquette, Dr. Easthope Awai and Dr. Dixon
cGPA: 4.0/4.0 (on going)

Lausanne, CH **Swiss Federal Institute of Technology in Lausanne (EPFL)**
2023 Visiting Student in Bioengineering – Robotics (project R.05 below)
Advisors: Dr. Manzoori and Dr. Bouri
Project GPA: 4.0/4.0

Paris, France **University of Paris – Cité**
2021-2023 M.Sc. in Informatics – Digital Sciences (project R.03/R.04 below)
Concentration in Biomedical Data Science
cGPA: 4.0/4.0 (summa cum laude)

Paris, France **University of Paris – Cité**
2018-2021 B.Sc. in Allied Health *(university title)* (project R.01/R.02 below)
B.Med. in Podiatric Medicine *(clinical title)*
cGPA: 3.7/4.0 (magna cum laude)

Recognitions

23 recognitions across France, Canada, and Switzerland, spanning institutional to global levels. Secured full PhD funding (CA$120,000), covering living and tuition expenses (Québec resident rate through the France–Québec agreement). Not eligible for major Canadian federal doctoral awards during the first three years of the PhD due to international student status; eligibility restored following a policy change for the 2026–2029 cycle (application under review). Undergraduate and master's studies in France were fully state-funded based on financial need, explaining the absence of major fellowships; funded only to support stays in Switzerland.

Awards

2026	Catherine Berg Student Travel Award – CRIR Montreal (CA$500)	*Non-competitive*
2025	Reimagine Education Award (Bronze) – Quacquarelli Symonds (QS) ***[Awarded as one of the six members of the McGill SciLearn team]***	*Competitive*
2025	NextGen Scholar – NSF (USA), IEEE-EMBS and Google (~CA$415)	*Competitive*
2025	Best Paper Award (3rd Place) – IEEE-EMBS BHI'25 (~CA$207) ***[Out of 500+ submissions, top ~0.6%]***	*Competitive*
2025	CRBLM Travel Award – McGill University (CA$700)	*Competitive*
2025	AQSAP Travel Award – Quebec Association for Physical Activity (CA$250)	*Competitive*
2024	ICS Travel Award – Canadian Institute of Health Research (CIHR) (CA$1,700)	*Competitive*
2024	Travel Award – Parkinson Canada (CA$1,000)	*Competitive*
2024	People's Choice Award – CRIR Montreal 3-min Thesis Competition (CA$50)	*Competitive*
2023	Graduated Top 3 M.Sc program (class of 2023) – University of Paris Cité	*Competitive*

Fellowships

2026	Graduate Student Award – Parkinson Canada (CA$40,000)	*Competitive*
2024	Ph.D. Recruitment Fellowship – Quebec BioImaging Network (CA$10,000)	*Competitive*
2023	Graduate Excellence Fellowship – McGill University (CA$60,000)	*Competitive*
2023	Anti-Black Racism Excellence Fellowship – McGill University (CA$10,000)	*Non-competitive*
2023	SMARTS-UP Scholarship – University of Paris Cité (~CA$7,800)	*Competitive*
2022	Visiting Scholarship – Lake Lucerne Institute (~CA$8,700)	*Non-competitive*

Fellowship Under Review

2026	Canada Doctoral Research Scholarship – CIHR (CA$120,000) ***[Selected as one of the 91 best applications forwarded by McGill to CIHR]***	*Competitive*

Honours

2026	Invited contribution to the BHI'25 Special Issue, IEEE Trans. Biomed. Eng. (TBME) Editors ***[Selected as one of the best paper at IEEE-EMBS BHI'25]***

2025 Invited for Undergraduate Thesis Defense Jury, AFREP Institute, University of Paris – Cité

2025 Guest judge for the 3-minute thesis competition, McGill University

2023 Guest student member of the admission committee, MSc program Digital Sciences U. Paris Cité

2023 Summa Cum Laude – University of Paris Cité *M.Sc. with cGPA>16/20*

2021 Magna Cum Laude – University of Paris Cité *B.Sc. with cGPA>14/20*

Grant Preparation

2026 CIHR Project Grant on "Rewiring the brain to alleviate freezing of gait" (CA$1,890,000)
[Contributed to the scientific content of the grant through suggestions for improvement]
PI: Dr. Paquette, Role: Non-applicant, Status: Under Review

Professional Experience

Research

2023 – Now **McGill HBCL & LLUI DART Laboratories**

Montreal & Vitznau Graduate Student Researcher

Canada & CH Referee: Dr. Paquette (McGill Supervisor), Dr. Easthope Awai (LLUI Supervisor)

Responsibilities: Initiated a multi-award-winning Swiss–Canadian collaboration combining neuroimaging, AI, and wearable sensing to improve the clinical interpretability of digital mobility biomarkers in Parkinson's disease. Activities include project conceptualization, funding acquisition, data curation (wearables, neurophysiological, clinical, and patient perception), data analysis, and dissemination to both scientific and community audiences through publications and knowledge translation initiatives. In addition, I mentor undergraduate and master's students and support the conceptualization, data collection, and analysis of fellow PhD students' research projects. I also serve as a reviewer for journals and conferences in digital health and AI, contribute to academic committee activities, and provide support for grant evaluation and writing.

2023 **EPFL Rehabilitation & Assistive Robotics (REHAssist) Group (part of BIOROB & TNE)**

Lausanne, CH Research Intern – Assistive Robotics (Project R.05 and Presentations below)

Referee: Dr. Manzoori

Responsibilities: Used data mining techniques to evaluate the biomechanical parameters explaining why one mode of active orthotic assistance (e-Walk exoskeleton) is more effective than another in reducing the metabolic cost of walking. Main tasks included multimodal data analysis (inertial motion capture, exoskeleton encoder data, force plates, etc.). Also involved in the evaluation of the active orthosis for mobility support. The role involved collaboratively conceptualizing experiments and conducting multi-terrain data collection (indoor and real-world) of functional outcomes (kinematic, metabolic cost, heart rate, FSR).

2022 **National Institute for Health & Medical Research – U. Paris Cité (INSERM UMR U1284)**

Paris, FR Research Intern – Biomedical Data Science (Project R.04 below)

Referee: Dr. Lhoste

Responsibilities: Prototyped a mobile health application (Flutter SDK) for fall-risk assessment in older adults, based on simple balance tests using mobile sensing and machine learning.

2022 **LLUI DART Laboratory**

Vitznau, CH Research Intern – Neurosciences and Digital Health (Project R.03 below)

Referee: Dr. Easthope Awai

Responsibilities: *Collaboratively collected, analyzed, and presented data to clinical partners and international audiences from a project integrating motion capture, virtual reality (VR), and wearable technologies to develop a novel VR-based visual–sensory contribution to balance assessment. The project was part of a larger multicentric pilot trial evaluating the effectiveness of a single session of a technology-assisted fall prevention intervention for older adults. For this larger project, tasks included leading the LLUI arm of the trial, contributing to conceptualization, participant recruitment, data collection (inertial/optical motion capture, force plates, clinical, neurophysiological), preliminary analysis, and collaboration with academic/industry partners.*

2021 **UTC Biomechanics & BioEngineering (BMBI) Laboratory** (Project R.01 below)

Compiègne, FR Undergraduate Research Initiation Intern – Biomechanics

Referee: Dr. Ben Mansour

Responsibilities: *Extracurricular internship. Conducted a mini-project on the effect of walking speed on peak plantar pressure. Tasks included data acquisition, basic signal processing, interpretation of biomechanical outputs, and results dissemination to lab members.*

2021 **Motion Analysis Lab Garches Foundation – Greater Paris University Hospitals (AP-HP)**

Garches, FR Undergraduate Research Initiation Intern – Biomechanics

Referee: Dr. Supiot

Responsibilities: *Extracurricular internship. Initiated to motion capture in neurorehabilitation. Assisted researchers during quantified gait analysis sessions with patients.*

Clinical

2021 – 2022 **Simone Veil Community Health Center**

Évry, FR Podiatrist Assistant

Referee: Prisca Lonn *(Head Podiatrist)*

Responsibilities: *Clinical practice (20%) in podiatric medicine conducted in parallel with the master's degree, with a focus on sports-related conditions, aging populations, and diabetic neuropathy. Activities included anamnesis, mobility assessment (e.g., gait and balance), design of custom medical devices (passive orthoses and prostheses), pharmacological and non-pharmacological treatment prescription, prevention and monitoring of complications, and communication with other healthcare professionals to support coordinated care.*

2020 **IMSS Stade Français Paris Rugby Club**

Paris, FR Clinical Training – Sport Podiatric Medicine

Referee: Christophe Blanc *(Head Podiatrist)*

Responsibilities: *Clinical training in elite sport (private sector). Assisted a senior sport podiatrist in anamnesis, mobility assessment, design of custom medical devices (passive orthoses), non-pharmacological treatment prescription, prevention and monitoring of complications, and communication with team physicians and therapists (~60 patients).*

2018 – 2021 **Greater Paris University Hospitals (AP-HP)**

Paris, FR Clinical Training – General Podiatric Medicine

Referee: Pr. emeritus Matillon *(University of Paris Cité and Lyon 1 University)*

Responsibilities: *Clinical training within Europe's largest university hospital center. Weekly rotations across hospital services and a podiatric medicine clinic to provide care to individuals with a wide range of lower-extremity conditions (1,000+ patients). Activities included patient assessment and anamnesis, gait and biomechanical evaluation, review and documentation of medical records, development and implementation of treatment plans (including orthotic management), prevention and monitoring of complications, and interdisciplinary communication*

with healthcare teams. Hospital services included Internal Medicine, Dermatology, Rheumatology, Endocrinology, Diabetology, Rehabilitation Medicine, and Geriatrics.

Teaching

2024 – Now **Office of Science Education, Faculty of Science, McGill University**

Montreal, CA Science Education Fellow

Referee: Dr. Armin Yazdani *(SciLearn Co-Lead)*

Responsibilities: Member of the McGill SciLearn team. Develop content and teach (in collaboration with cognitive neuroscientists and education developers) the basic principles of neuroeducation to 1000+ undergraduate students and instructors (teaching assistants) in the Faculty of Science. Manage a collaborative learning space dedicated to first-year science undergraduate students. Co-create the "Étudions Ensemble" program, a university-wide initiative aimed at providing McGill students who wish to study in French with a space to study and build connections. Conduct research on the efficacy of neuroeducation interventions on student performance. Organize and facilitate events, including student research showcases and instructor-focused sessions, and meet with McGill administration to promote initiatives and support program development.

2024 – 2025 **Department of Kinesiology and Physical Education, McGill University**

Montreal, CA Teaching Assistant

Referee: Dr. Paquette *(Instructor)*

Responsibilities: Assisted Dr. Paquette in the "Motor Control" course by addressing students' incomprehension, mentoring them during tutorials, contributing to exam design, and supervising and grading both written and oral exams.

2024 – 2025 **Department of Rehabilitation, Faculty of Health, AFREP, University of Paris – Cité**

Paris, FR Lecturer

Referee: Pr. emeritus Matillon *(University of Paris Cité and Lyon 1 University)*

Responsibilities: Developed and delivered 4×20 hours of online courses on the basics of research methodology, with one part in the fall and the other in the winter. Activities included full course design (quizzes, finals, practical, and assignments), as well as coordination of guest lecturers.

Publications

Main focus include the use of data science, neuroscience, and wearable technologies to advance the management of mobility dysfunction in aging and Parkinson.

Service

Open-Source Contribution

2026 **GaitHub**, McGill
Pre-release of a software to easily analyze movement wearables data.

2025 **PyComplexity**, McGill
Python module to easily compute the attractor complexity index from wearables.

2023 **MakerRehab**, CRI (LPI), University of Paris
Prototype of an mHealth technology to predict fall risk from smartphone accelerometers.

2022 **Into the Darkness**, CRI (LPI), University of Paris
Prototype of a virtual reality experience designed to elicit empathy in people affected by depression.

2022 **Blind Check**, CRI (LPI), University of Paris
Prototype of a robotic guide dog for people with visual impairments.

Social Mobilization

2024 **Patient Engagement Workshop**, Parkinson Canada
Participation in a workshop aimed at improving interaction between researchers, patients, clinicians and industrial partners to enhance patient engagement in Parkinson's research.

2022 **Hackathon**, HackaHealth Zürich
Participated in hackathon to develop solutions for people with disabilities.

2017 **Fundraising Events**, Or Bleu
Participation in soccer tournaments to finance the construction of water wells in Mali.

Organizing Committee

Fall 2025 **SciLearn Orientation Week Workshop**, McGill University
Co-facilitator and co-organizer of a workshop aimed at providing undergrad science students with basic knowledge of neuroeducation.

Fall 2025 **SciLearn TA Training Workshop "How Students Learn"**, McGill University
Co-facilitator and co-organizer of a workshop aimed at providing teaching assistants in Chemistry with basic knowledge of neuroeducation.

Winter 2025 **SciLearn Orientation Workshop "Prep for Finals"**, McGill University
Co-facilitator and co-organizer of a workshop aimed at providing undergrad science students with basic knowledge of neuroeducation.

Winter 2025 **SciLearn Orientation Workshop "MidTerm Bounce-Back"**, McGill University
Co-facilitator and co-organizer of a workshop aimed at providing undergrad science students with basic knowledge of neuroeducation.

Winter 2025 **Undergraduate Science Showcase 2025**, McGill University
Co-organizer of a conference aimed at providing undergrad science students the opportunity to present their research.

Fall 2024 **SciLearn Orientation Workshop "Prep for Finals"**, McGill University
Co-facilitator and co-organizer of a workshop aimed at providing undergrad science students with basic knowledge of neuroeducation.

Fall 2024 **SciLearn Orientation Workshop "MidTerm Bounce-Back"**, McGill University
Co-facilitator and co-organizer of a workshop aimed at providing undergrad science students with basic knowledge of neuroeducation.

Winter 2023 **AIRE Master Seminar 2023 "AI & Medicine"**, CRI (LPI), University of Paris
Co-organizer of a workshop on AI in medicine.

Peer Reviewing

2025 **IEEE-EMBS International Conference on Biomedical and Health Informatics (BHI'25)**
Ad hoc review of 6 articles on Precision Health and AI.

2024 **Medicine & Science in Sports & Exercise**
Ad hoc review (via supervisor) of an article on wearable technologies for monitoring mobility disorders in people with Parkinson's disease.

Teaching

McGill University

Fall 2025 **Teaching Assistant –** EDKP 447 (Motor Control).

Fall 2024 **Teaching Assistant –** EDKP 447 (Motor Control).

University of Paris (AFREP)

Fall 2025 **Graduate Student Instructor –** UE 5.4 (Research Initiation).

Winter 2025 **Graduate Student Instructor –** UE 5.3 (Research Initiation).

Fall 2024 **Graduate Student Instructor –** UE 5.4 (Research Initiation).

Winter 2024 **Graduate Student Instructor –** UE 5.3 (Research Initiation).

Mentoring

2026 ***Justin Wu**, B.S. Student in Kinesiology, McGill U.*

2026 ***Florian Gourdin**, M.S. Student in BioEngineering, Polytech Marseille.*

2024-2026 ***Jae Young Park**, M.S. Student in Kinesiology, McGill U.*

2024-2026 ***Tomoha Ogawa**, M.S. Student in Kinesiology, McGill U.*

2024-2027 ***Clara Guedes**, B.S. then M.S. Student in Kinesiology, McGill U.*

2024-2026 ***Dahlia Leibovich**, B.S. Student in Kinesiology, McGill U.*

2024 ***Laura Higuita**, MITACS B.S. Student in BioEngineering, UAO, Columbia*

Invited Talks

McGill University *Guest Lectures on the Neurosciences of Learning, Memory and Attention*

2025 – 2026 **CHEM 110.** General Chemistry 1.

2024 – 2025 **CHEM 120.** General Chemistry 2. (with Hilary Sweatman)

2024 – 2025 **PSYC 204.** Introduction to Psychological Statistics. (with Hilary Sweatman)

Relevant Training

2024 **Researchers and Entrepreneurs Network Program (RCE)**, V1 Studio

2023 **Integrating sex and gender into health research**, Canadian Institute of Health Research

2023 **TCPS 2 CORE-2022 (Research Ethics)**, Government of Canada

2022 **Gait Analysis & Rehabilitation using CAREN (Operator Level 1)**, Motek Medical

2021 **AFGSU 1/2 (emergency care)**, French Ministry of Health
